Perhaps The Most Beautiful
Braille Tablet Ever
Created

insidevision CSUN 2022

All in One

Innovative and Elegant Design

No Wires to Connect, No Docking Stations, No Worries

- Instant Braille Translation to Text and back.
- Integrated 32-cell Braille Display.
- Gorilla Glass® Touch-Screen.
- Integrated Braille Keyboard.
- 8 by 11.5" Solid Aluminum Frame.
- Digital Cursor Routing Keys.
- Smartphone-like Gestures for Navigation.

The Capable Desktop Replacement

1. Microsoft **Windows 11 Home** or **Pro 64 bits**.
2. Processor: **i7** 10th Generation, **Quad Core** - 8 Threads.
3. **Dual Channel** LPDDR3 2133MHz.
4. **RAM - 16 GB**.
5. SSD Hard Drive from **256 GB** to **1 TB**.
6. 2 Stereo **High Quality** Speakers - 2W.
7. 1 Microphone.
8. **16MP** Autofocus Back Camera and **LED for OCR**.
9. **5MP** Front Camera.
10. Ports: USB C, USB 3, Micro HDMI, Mini USB, 3.5 mm Audio Jack.

The Power is in Your Hands

1. Install any Windows-compatible Programs.
2. Run Multiple Simultaneous Application Fast.
3. Pick NVDA or JAWS with a keystroke on a fly.
4. Browse Internet, use Google Drive, Google Classroom, OneDrive or Dropbox without getting bogged down.
5. Navigate the insideONE+ with the smartphone-like Hand-Gestures.
6. If you know shortcut keys for Windows such as those to open, save or print a document, you will master the insideONE+'s structure of keystrokes quickly.
7. Connect the insideONE+ to another PC and use it as a Braille display.

How it works

- Place your fingers on Dots 1,2,3,4,5,6 to activate a keyboard.
- Start Typing and Reading Braille.
- Use Dot 9 - left space bar, and Dot 0 (zero) - Right space bar to create keyboard shortcuts.

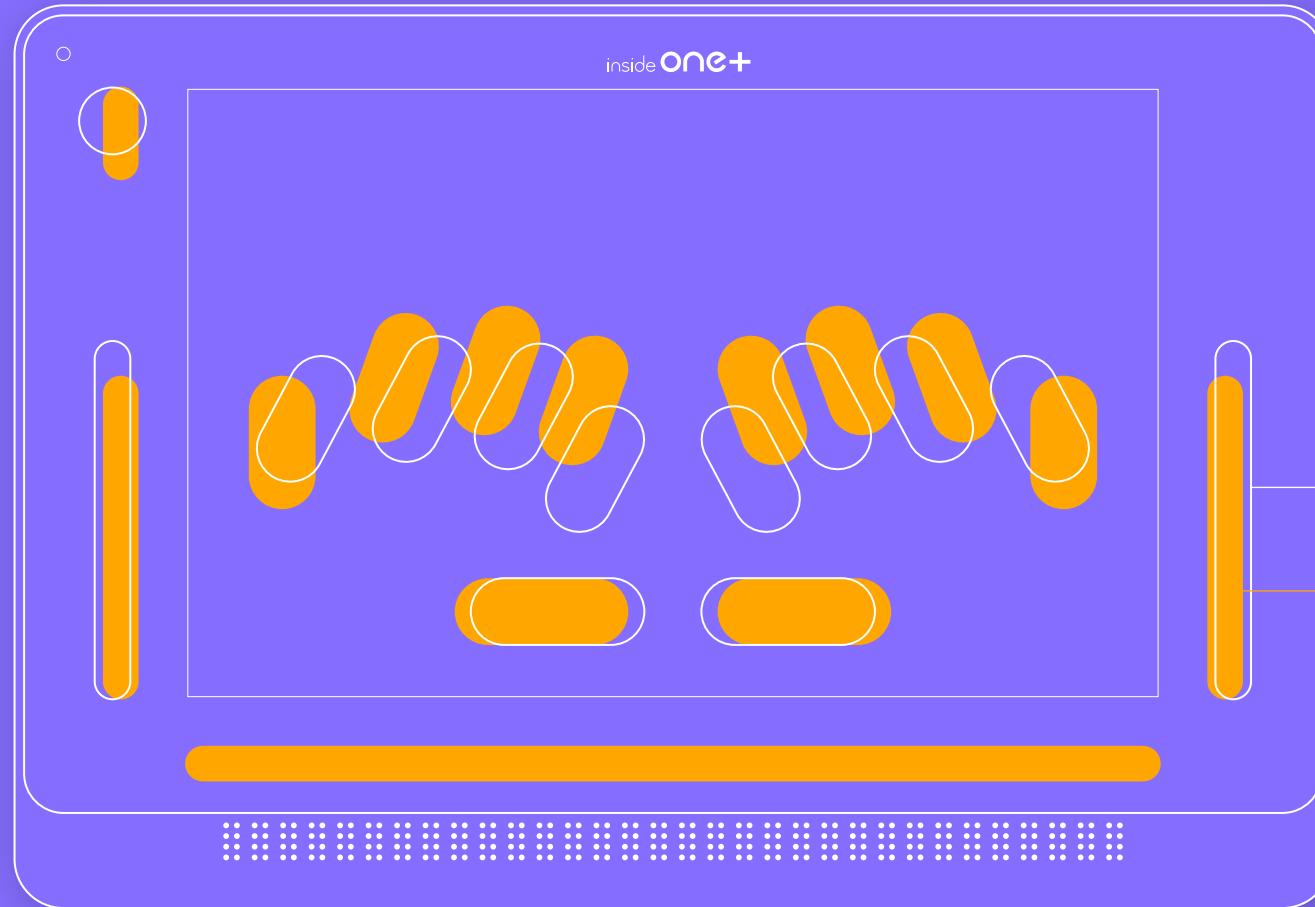

Multiple ports for connectivity!

New ergonomic tactile Braille keyboard

New layout
designed by
blind users.

Previous position

New position

inside **One+** Navigation

Smartphone-like hand gestures:

- Finger swipes
- Finger taps

Examples Using The Right Slider:

Using right space bar, key 0 (Zero)		Using left space bar, key 9 (nine)	
Alt	1+0 (A+0)	F1	1+9 (A+9)
Control	1+4+0 (C+0)	F2	1+2+9 (B+9)
Shift	2+3+4+0 (S+0)	F3	1+4+9 (C+9)
Escape	1+5+0 (E+0)	F4	1+4+5+9 (D+9)
Tab	2+3+4+5+0 (T+0)	F5	1+5+9 (E+9)
Windows	2+4+5+6+0 (W+0)	F12	1+2+3+9 (L+9)

Building Communication Bridges

In Schools, Offices and Homes

Communication

- Braille input is instantly displayed on a screen allowing sighted people to read what was Brailled in.
- Anything typed on the on-screen virtual QWERTY keyboard is immediately available on the Braille display no matter which braille grade is used.

The Advantage

1. First truly integrated mainstream-looking braille tablet - the most capable desktop replacement.
2. Two Screen Readers - NVDA and JAWS - are installed enabling a user to pick the best screen reader for a job at hand.
3. Windows Operating System to prepare students for future employment opportunities.
4. Universal Communication Tool to ease communication between the sighted and the blind people. Braille typing is instantly translated into a text for the sighted and vice versa. Whatever is typed in text is displayed on the 32-cell braille display.
5. Lightweight and sturdy.
6. The new location of Braille keys, suggested by blind users, makes typing easy and tireless.
7. Two-year comprehensive warranty backed by the Insidevision, a Microsoft Partner.
8. Package includes: insideONE, Embossed navigational Key Commands, Power Adaptor, a Carrying Case, One-Hour Over the Phone Customer Training.
9. Risk-Free Purchase with a 30-day Return Policy.
